About This Game

Summary

rFactor 2 is a realistic, easily extendable racing simulation from Studio 397. It offers the latest in vehicle and race customization, great graphics, outstanding multiplayer and the height of racing realism. rFactor 2 features mixed class road racing with ultra realistic dynamics, an immersive sound environment and stunning graphics.

You can race against a field of AI cars, or in multi-player mode against others. The simulation supports a full day-night cycle as well as dynamically varying weather conditions such as rain. Tracks feature "real-road" technology that changes the grip as more cars drive on it. In multi-player mode, driver swaps are also supported, allowing you to run even full 24 hour endurance events. Everything can be customized by the community, including adding new tracks and cars, and a wealth of add-ons are available online.

rFactor 2 is also an evolving product, which will be updated and added to for many years, so the list of features will expand!

terrible game bad controls wasted 5 bucks i feel.. I enjoyed it, but way too hard for me.. I just dont like taking my time.. xD

6-10. If you're looking for a match 3 style game with some mature content, Just get "Mirror" instead. Better gameplay content, Better progression or story content, Better mature content, Better price, and just more content.

HuniePop is also a good alternative but it also contains a lot more dating simulator style gameplay so a warning to those who don't like that kind of gameplay.. unbalanced characters ruining the game

. This game is a bit sluggish on linux computers, but it plays just fine on a windows 7 machine. Void Monsters is an original game and one I [like](#).[In fact it can be addicting & I play this alot. It doesn't matter what character you play as because you can eventually be beyond their skills with another character. Normally I don't like match 3 games, but in this game I don't mind them because you can get runes that way. I just wish they made more games like this one. It's fun, addicting and time consuming. This game has alot of quests so you get your money's worth out of it. I got it when it was on sale for \\$1.99 and if I knew I'd like it this much, I would have bought it at full price. I like games with new concepts like this one.. pros-](#)

[-Get to watch empires rise and fall](#)

[-many different things can happen making each game unique](#)

[-You are given the options to change the game to anyway you like](#)

[cons-](#)

[-rough around the edges. With bad UI, no way to turn off the music, ect.](#)

[overall it is worth 5 dollars if you're like me and love this sort of thing. The game itself is the only game like it on steam and I can get over the bad parts pretty easy. It's a very great way to kill time. But NEVER use this to teach your kids about maths, science, religion, or anything in fact.. What there is to say?](#)

[Go play this game, it starts average but become a lot of fun later on.](#)

Like this:

- Really nice-looking art
- Interesting mix of genres
- Good story
- The idea is quite interesting too
- Great atmospheric soundtrack
- Casual and not casual at the same time

Don't like that:

- Lack of details

I will return to 'Ashley: The Story Of Survival' to spent more time.. It hurts my soul to say this, but I would not recommend the game at all. The developer has officially announced that he is stopping production, and is removing it from the store. What you have is a very rough iteration of Total Miner as it was on the Xbox. Missing many features, including (and most importantly) multiplayer. The way I see it is, once you release a game on Steam, especially early access, and are asking money from people with promises of the future, you must make the game have a higher priority, instead of just "when I can". You're taking customers for granted when you disappear for a year with no updates to an already incomplete port of a complete game. I'm sorry, but I'm not on board. Say what you will, but if you knew you couldn't commit, you shouldn't have even asked money for it.. This game is not really a game where you can build and run railroads. You first have to be trained (no pun intended) on running real locomotives. It is all set on routes the developers have pre-selected.

This is like having to go back to school and take tests before the program lets you do anything.

I did not find it fun... AT ALL...

I would not recommend this program to anyone, unless you want to learn how to run real locomotives on routes that you have no desire to use.. Fun Platformer, lots of levels and gets harder and harder with time.

needs controller support and achievements + cards. I really enjoy short but regular sessions on Hyperun.

I just reached 500 kmph and it was really fun, hardcore, mesmerizing, especially as the speed sensation is really awesome.. This is the first game I've played on Steam. I rarely play any PC or console games at all. This met my hopes and expectations. I don't regret the purchase AT ALL! I will have much fun playing this classic with my family and friends. I don't like the online multiplayer world but I love playing against family and friends and with this game you can do just that. I'm looking forward to doing the same thing with the golf game in my wish list, hopefully without all that upgrading clubs, equipment, clothes and skill level crap and without having to play LAN-style on separate computers in the same house like with WGT or Tiger Woods. I'm looking forward to more classic and popular modern board game adaptations becoming available too. The only thing that was a bit disappointing with this game was having to play it in the 4:3 aspect ratio. It was enjoyable enough but I would love to have it fill the screen in an update (or if I'm missing something, I would love to have someone explain to me what I'm doing wrong). A big thank-you (and a nudge and a wink) to the developers. :)
